CIRCULATING THROUGHOUT THE VAST AGRICULTURAL AREA OF PALM BEACH COUNTY

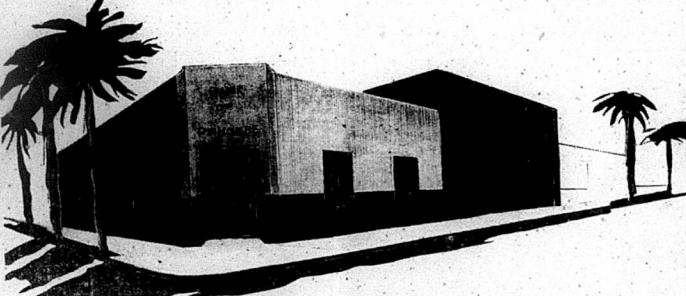

BANK OF PAHOKEE WILL ENLARGE AND REMODEL

Gas Tax Refund Forms Available

Farmers who are interested in filing for refund for the Federal Gasoline Tax on gasoline used on the farm may obtain application forms and instructions on how to fill them out from the County Agricultural Agent's Office, Glades Office Building, Belle Glade, or from the County Agricultural Agent's Office, Mounts Building, West Palm Beach.

These forms must be filed before September 30th for the gasoline used between July 1, 1961 and June 30, 1962. Refunds may be claimed by the farm owner, operator, or tenant depending on who actually bore the cost of the gasoline. Growers who hire custom work may claim a refund for gasoline used on his farm by a custom operator.

This is not to be confused with the claim for the State Tax Refund on gasoline used on the farm, as Federal Tax Refunds must be filed annually before the 30th of September, whereas, the State Tax Refunds are filed at the end of each calendar year. The amount of Federal Tax is \$0.04 for each gallon of gasoline used. State Gasoline Tax Refund applications are also available through the County Agricultural Agent's Office.

ARTIST'S CONCEPTION OF BANK OF PAHOKEE WHEN WORK IS COMPLETED

Keeping step with progress in the Lake Okeechobee Region, Bank of Pahokee officials have announced a plan to enlarge and remodel the popular financial institution. The former Cross Hotel, next door, will be utilized in the remodeling plan.

Taking in the former hotel will give a great deal of additional space. The floor space will be added to the banking facilities and the upstairs of that building will be used for storage space, officials said.

In the present lobby plans call for remodeling with new fixtures and three additional teller cages, to complete new set of offices for

President Rupert Mock, Vice President Julius Moon and Assistant Vice President Martha McIntosh. Mrs. McIntosh's office will serve as a reception center where she will direct that operation as well as handle public relations for the bank.

A directors' room will be among the new conveniences when work is completed. A ladies lounge and kitchenette will also be among the modern additions, it was pointed out. A night depository will be added as another convenience for patrons of the institution.

The parking lot at the rear of the bank will be enlarged and a cordial invitation extended to patrons of the bank to use it.

The local bank has the distinction of being the "Oldest Bank in Palm Beach County," and enjoys a thriving business from the entire western section of the County.

Always conservative in its operations, the bank and its officials

continues along that same line as it goes into its 41st year of service to the area. The bank today is under the direction of President Rupert Mock, Vice President Julius Moon, Assistant Vice President Martha McIntosh, Cashier Gene McLwain and Assistant Cashier Frank Gillis. On the board of directors are: Mrs. McIntosh, Mr. Mock, Mr. Moon, Mr. McLwain, WPB Attorney Bob Ernest and Lewis Friend.

Passion Play Four Times Week 1963

LAKE WALES—The 1963 season of the Black Hills Passion Play at the Lake Wales Amphitheatre will call for four performances each week.

Evening performances will be held Tuesday, Thursday and Saturday. There will also be a Sunday matinee performance each week throughout the season stretching from Feb. 10 to the following Easter Sunday.

Fred E. Orr, resident manager of the Amphitheatre, said the Josef Meier Company will go on tour this fall as soon as its current summer season in the Black Hills of South Dakota ends early in September. The tour of midwest states will continue until mid-December.

Delta Airlines Buys New Jets

MIAMI—Delta Air Lines has accepted delivery of four additional Convair 880 jets, valued at \$17 million. With its Convair 880 fleet increased to 16, representing an investment in excess of \$70 million, Delta now has accepted all of the 615-MPH jetliners on order.

The "Aristocrat of the Jets," the "Super Scooter," as the 880 sometimes is known, has repeatedly added to its laurels. It presently holds nine official records, plus numerous unofficial marks.

In May of this year, Delta converted its Caribbean service to an all jet operation, employing Convair 880's from Los Angeles, San Francisco and Dallas to New Orleans, San Juan, Puerto Rico; Montego Bay, Jamaica; and Caracas, Venezuela.

State's Minerals Worth \$180 Million

JACKSONVILLE—The Florida State Chamber of Commerce says the value of minerals in the Sunshine State reached a record \$185 million last year. This was a four per cent gain over the previous year.

More limestone is mined in Florida than any other mineral. Phosphate, in which Florida leads the nation, is more valuable, the chamber said. Last year's limestone production came to 27 million tons valued at \$36 million. Phosphate amounted to 13 million tons with a preliminary value of \$93 million.

VACATION IN WEST

Mr. and Mrs. Elmer Maxson left last week to spend a three-week vacation in the West. They will attend the World Fair at Seattle, explore Yellowstone Park; visit Mr. and Mrs. Roy Maxson in Merced, Calif., her relatives in Los Angeles and relatives in Pittsburgh, Kan. and West Point, Miss.

Mr. and Mrs. H. G. Boynton had as a recent guest, his brother, Senator Boynton of Bartow.

Needs For A Joint Hospital Are Pointed Out Here

Savings In Florida Pass 4 Billion Mark

ORLANDO—Total assets of the 119 savings and loan associations in Florida passed the \$4 billion mark for the first time during June.

Citing the growth of the savings and loan business in Florida, William D. Hussey, executive vice president of the Florida Savings and Loan League, stated that in 1950 Florida had 59 associations with total assets of just over \$378 million.

Newspaper Force On Vacation For Much-Needed Rest

The Everglades News office is closed this week and the force is on vacation taking a much-needed and well deserved rest. This week's issue of this great palladium of the family fireside may be just a little short on local news, but we feel sure that this will be made up in coming weeks. During the nearly 40 years that this newspaper has served the vast agricultural area on the eastern shore of Lake Okeechobee, it has never missed an issue, come flood, hurricane, or other antics of weather. We have been fortunate and hope that luck stays with us during the next 40 years.

A preliminary report just released by Tracy Hare, hospital consultant, and Irani and Associates, architects and engineers, to the Combined Public Hospital Board of the Northwestern and Southwestern Palm Beach Public Hospital Boards, underlines the critical need for new hospital facilities in the Belle Glade-Pahokee area and recommends improvements.

Citing the area's need for "the best possible hospital care for the areas involved within the limitations of economic and human resources," Hare has analyzed conditions of the two existing facilities now serving the communities in Western Palm Beach County.

The report states that Belle Glade Memorial Hospital is a 45-bed facility built before World War II for the specific purpose of hospitalization of migrant workers in the area.

The hospital (like most hospitals of the era) was poorly designed, but built too well. As a structure, it is sound, but is not fire resistant. In addition to the poor functional design and a room arrangement allowing little flexibility, the roof and floor is built with combustible materials. This area has substantially outgrown the bed capacity and auxiliary facilities are outgrown entirely. In

the past the hospital has been very poorly operated but in the last two years service and appearance has greatly improved.

"Pahokee Everglades Memorial Hospital is a 45-bed institution built in 1949 of acceptable fire resistant construction but inadequate in design and size. Unfortunately all the dimensions are skimpy and the auxiliary facilities substandard in size and capacity. It was surveyed in 1960 and declared unsuitable because of insufficient space and facilities. The hospital has seen rapid turnover in administration—7 in 13 years. There is a chronic shortage of trained or skilled personnel," the report said.

Renovating the Belle Glade Hospital has been mentioned as a possibility for improving medical facilities for the Southwestern District. However, a great expense would be involved considering the extent of remodeling needs.

According to the report, conversion of the present Hospital to acceptable standards of safety, sanitation and function would involve more than additional space for beds and core facilities.

The entire floor would have to be removed and replaced with a concrete slab, either concrete slab or fill, concrete slab on concrete joists, or pan type concrete. This

would be extremely difficult and would probably create irreparable damage to partitions. The piling is not designed for this type of construction and all or some of the pilings would have to be removed and replaced with some form of foundation.

"Plumbing would have to be brought up to date with demolition and removal of a large portion of the present system. The heating system now 21 years of age would have to be repaired and all defective parts replaced. Windows now in the building are casement type and should be replaced. However, with installation of an air conditioning system, caulking or sealing the windows would be acceptable."

The report goes on to state, "that there are several methods available to bring into line the roof and ceiling including sprinkling the entire area with installation of a false ceiling of fire resistant material."

"The building, because of its age, should be completely rewired with heavier currents and convenient outlets. A communications system, nurse call, etc., should be installed. The doors are 3' 4", in width, now fire resistant, set in wood paneling, rating below present day standards. All rooms leading into patient's rooms should be a

Travel Ads In State Are Highest

MIAMI—Florida spends more than any other state on travel advertising and promotion, \$1,722,000 for the current year, with the Florida Development Commission administering the program. Next largest is Hawaii with \$1,200,000. These facts, and many others,

listed in a second edition of "Profile of the American Tourist" which is distributed by the American Automobile Association.

The book says Florida has more motels than any other state, some 5,460, as compared to California's 5,000. Florida tourists also spend more money in the state than any other except New York, which tops Florida's tourist income by some \$600 million.

Monday Cattle Sales . . .

Are regularly held at the Glades Livestock Market which is owned and operated by more than 120 Florida Cattlemen.

You'll enjoy the excellent service you receive here at this Market. We make an effort at all times to give an outstanding service to buyer and seller. Give us a trial.

Suwannee River State Park Shows Natural Beauty

The natural beauty of North Florida is typified by Suwannee River State Park, located off U.S. 90 at Ellaville, 13 miles west of Live Oak.

The lands made famous by Stephen Foster has woodlands, open fields, and rocky bluffs. Above all, it has the scenic Suwannee River.

The park's 1,831 acres are pierced by the Suwannee on the East, where the main recreation area is centered, and on the West by the Withlacoochee, which joins the Suwannee within the park's boundaries.

The picnicking park has Confederate earthworks erected to protect navigation on the river. The old town of Columbus—non-existent, but once, years ago, the chief point of navigation—is near the park entrance. An old fort in the park guarded the railroad bridge, which was the chief objective of the Union Army in the Battle of Olustee, Florida's most important Civil War engagement.

The park, noted for its fine fishing, boating, picnicking, and camping facilities, is another reason Governor Farris Bryant and the Florida Development Commission are urging Floridians to see their

own state this summer.

The Stephen Foster Memorial, at White Springs, is not far from the park. Developed as the state's tribute to the famous composer, the 243-acre park has a 200-foot carbon tower which daily peaks forth beloved Foster songs. Within the tower base are furnishings of Foster's era and two animated dioramas depicting his most familiar compositions.

The Foster Museum, built as an ante-bellum mansion also contains dioramas and two large paintings by Howard Chandler Christy. Rides on the Suwannee River may be taken on a 30-passenger river boat, "Belle of Suwannee." A motorized Conestoga Wagon train, modeled after prairie schooners, takes passengers on tours of park trails.

East of Lake City is the Olustee Battlefield Monument. Besides learning how Confederates repulsed the Union Army and seeing at the museum relics from the war, visitors are offered scenic picnicking facilities beneath giant oaks.

Found in this north section of Florida are some of the state's most beautiful springs. Like White Springs itself, many are along the Suwannee. These include Troy Springs (near Branford) and Fanning Springs, Hart Springs, and Manatee Springs State Park (near Chiefland). Each of these springs has been developed into a recreation area. Manatee Springs has camping, as well as swimming, boating, and picnicking facilities. Another outstanding state park

is O'Leno, located near High Springs. During the summer months, the park becomes one of the state's busiest group-camping bases. The beautiful Santa Fe River, a tributary of the Suwannee, courses through the park and may be seen from a swinging footbridge.

A park noted for fine family accommodations is Gold Head Branch State Park, near Keystone Heights. Lake Johnson, largest of the park's lakes, is the focal point of the recreation area. The park is one of two in Florida that has cabins for rent. Moreover, tent and trailer camping may be enjoyed.

North Florida, with its scenic rivers, lakes, and springs, has many recreation areas and attractions worth visiting this summer.

Wainwright Is New Prison Head

TALLAHASSEE — Louis L. Wainwright, a guard at Raiford State Prison 10 years ago, has taken over direction of the Florida prison system.

He is a close associate and protege of his predecessor, H. G. Cochran, and the new prison chief says he has no plans for personnel changes and no ideas of major policy changes.

Wainwright says one of his biggest jobs will be to educate the public and the legislature to the needs of the prisons.

You feel good all over
when you call Long Distance

You laugh and you talk and you get the feeling you're there, right there. If you shut your eyes, you almost think you can touch each other. That's fun. That's nice! But really, the nicest part is you can do this anytime you feel like feeling good. Like right now!

Southern Bell
...Growing with the Future

"Today we need a nation of Minute Men . . . citizens who regard the preservation of freedom as a basic purpose of their daily life"

—JOHN FITZGERALD KENNEDY

10 days after his inauguration
as the 35th President of the
United States.

Twenty years ago, in the dark, uneasy days before Pearl Harbor, the Minute Man of Concord, timeless symbol of our Nation's determination to defend its freedom, emerged as the emblem of the U. S. Savings Bonds Program. When war came, the Minute Man became the rallying force behind the huge and overwhelmingly successful effort to back our fighting men with War Bonds.

In this, the 20th anniversary year of Savings Bonds, the Minute Man of Concord calls all Americans to an unremitting effort to help preserve our peace and freedom, threatened by forces more powerful and resourceful than those we faced in 1941. Though this effort will take many forms, one way open to all is the continued investment in Shares in America, U. S. Savings Bonds, by *"citizens who regard the preservation of freedom as a basic purpose of their daily life."*

BUY U.S. SAVINGS BONDS

For 20 years America's newspapers have published Savings Bonds and at no cost to the Government, The Advertising Council has helped The Advertising Council and this newspaper for their patriotic support.

PERSONAL NEWS NOTES

Mr. and Mrs. Karl Mindlin have returned from a three week vacation trip to Europe. They visited Madrid, Granada, Alicante, Valencia and Barcelona in Spain, and Milan, Venice, Rome and Florence in Italy. Mr. Mindlin stated that Spain is lovely and as yet unspoiled by commercialism, whereas in Italy one sees three tourists to each native Italian.

Mr. and Mrs. Fred Flanders and family of Boynton Beach spent the weekend with her parents, Mr. and Mrs. George D. Rushing. They were accompanied to Pahokee by her sister, Judy Rushing, who had been their house guest for a week.

Gene Parnell enrolled at the University of Miami, recently and will study there during the second summer session.

Ron TerHaar returned recently from Vero Beach where he has been assigned for the past month with the FEC Railroad. During the month of August, he will stay with Mayor and Mrs. Duncan Padgett while he is working as agent with the FEC at Belle Glade.

Miss Rebecca Grimes entered Miami University, July 30, and is attending the second session of summer school. She will reside with her mother, Mrs. Ralph Grimes, who also attended the first session.

Mr. and Mrs. Richard Thierry and sons, Paul and David, of Daytona Beach were guests, last week of her parents, Mr. and Mrs. L. L. Shirley.

Torreya Park Is Like Garden Of Eden

Was the Garden of Eden actually located in Northwest Florida? Some have theorized that it was. These people point out that certain vegetable and animal life mentioned in the Bible is native to Northwest Florida. In particular, they contend that the rare Torreya tree (a hard gopher wood) is the Biblical gopher wood that Noah used in building the Ark.

Whether or not their contention is correct, Torreya State Park and the surrounding area seem blessed by nature. The park, located 15 miles north of Bristol, lacks only a few feet in being the highest area in Florida. High bluffs rising 230 feet above the Apalachicola River are dented by deep gorges and dells.

On the park's 1,098 acres grows an astounding variety of trees, plants, and flowers. Great pines, red gums, hickories, and oaks grow along with birch, lindens, hollies, magnolias, red bays, and poplars. In addition to the Torreya tree, discovered by Hardy Croom and named in honor of his friend, Dr. John Torrey, the park also has the even rarer Florida Yew, also discovered by Croom.

The trees, plants, shrubs, and flowers are reminiscent of those growing in the Allegheny Mountains. As in the mountains, Indian pinks bloom on the hillside in the spring, while brilliant cardinal flowers dot the bottom land in summer. Ferns, mosses, and lichens are also in abundance.

This Eden-like park is another reason Governor Farris Bryant and the Florida Development Commission are urging Floridians to see their own state this summer.

Those visiting the park will enjoy touring the Gregory House, an antebellum home built by Jason Gregory in 1834 at a landing across the river. The house was acquired by the Park Service and moved

piece by piece across the river. A River Trail leads from the house down to the river, past six gun pits which—during the war—were used by Confederate troops to guard the river. Another trail from the camping area leads to a waterfall with a 12-foot drop. The path bypasses a large Indian mound, near the site of a former Indian village.

South from Bristol on the Gulf is the pictureque town of Apalachicola, famed for its oysters and other seafood. Years ago, when ships from all nations anchored in its harbor, the historic port was one of Florida's largest. Dr. John Gorrie, one of its early citizens, is world famous because he invented—while designing an air-conditioning system for fever patients—the first ice-making machine. Models and historic materials are on display in the Gorrie Museum.

Across from Apalachicola is St. George Island, a beach resort reached by a ferry taken at Eastpoint, just across Gorrie Bridge. The 28-mile island is noted for its sand-duned beaches. One high dune, Sugar Hill, rises 75 feet and is believed to be the highest in Florida. The Bob Sikes Channel separates the main island from Little George Island, which can be reached only by boat. The famous St. George Lighthouse built by the British is on the smaller island.

Across from the fishing resort of Carrabelle is Dog Island, also accessible by ferry. Although smaller and less-developed than St. George, Dog Island, too, offers scenic, sand-duned beaches.

The Garden of Eden may not have been located in Northwest Florida, but visitors to section will find the highlands of Torreya State Park, the historic appeal of Apalachicola, and the fun of exploring St. George and Dog Islands a vacationer's paradise.

Stetson Head Visits Philippines Univ.

DELAND — Stetson University President Ollie Edmunds represented the Association of American Colleges at the inauguration of the new president of the Central Philippines University at Iloilo recently.

The ceremony inducting Dr. Joe Howard as president of the only Baptist college in the area was performed by American Ambassador William Stevenson.

Edmunds has been on a trip through the Orient and Southwest Asia and plans to visit all Baptist colleges in that part of the world.

RAMEYS ARE HOME

Mr. and Mrs. George Ramey have returned from a months vacation spent at Springhill, Kansas, where they visited his mother, Mrs. Mattie Ramey, and her twin sister, Miss Minnie Osborn, who will celebrate their 96th birthdays in December. Mr. and Mrs. Ramey also visited his sister, Miss Maude Ramey and other relatives.

ATTEND FUNERAL

Among those attending the funeral services for Mrs. Maude Murphy in Miami, last week, were Mr. and Mrs. Ellis Murphy and son, Mr. and Mrs. Chester Mullis, Mrs. Marie Kincaid, Mrs. Joe Guerry and daughters, Miss Alice, and Mrs. Catherine Wood.

ADULT SWIMMING CLASS

Coach Keene has announced that he started an adult swimming class July 31. The lessons begin at 9:30 a. m. and there is a fee of \$1.00 for all who join plus 25c each day to get in the pool.

Dr. and Mrs. R. C. Lane and family returned Sunday from a visit with their mother, Mrs. M. B. Carlton in Lake Worth.

Picture of a Promise

*Sure, she's a grand old flag!
That's why we salute her.
That's why we pledge allegiance to her.*

*That pledge, in its simplest terms,
Is another way of saying, "Count me in.
You count me in and I love you
and need you. Your problems are
my problems, and I'm with you
all the way."*

*Your country's biggest single
problem is the perpetual responsibility
for keeping the peace its people
want. You can help with this
problem by remembering this:*

*Peace costs money. Money for
military and industrial strength.
Money for science and education.
And money saved by individuals —
by you — to help keep the economy
strong. Bonds provide this money.*

for their patriotic donation, The Advertising Council and*

New 3 3/4% interest on U.S. Savings Bonds

The Treasury explains why the new ones you buy and the ones you own now are better than ever

Q: How does the new 3 3/4% interest rate benefit me?

A: With Series E Bonds, the rate turns \$18.75 into \$25.00 fourteen months faster than the old rate. Your savings increase faster, because your Bonds mature in just 7 years, 9 months. With Series H Bonds, the 10-year maturity period stays the same but more interest is paid you each six months. With both E and H Bonds the new rate works out to 2 1/4% for the first year and a half; then a guaranteed 4% each year to maturity.

Q: When did the new rate become effective?

A: June 1, 1959.

Q: Does the new rate change the Bonds I bought before June 1, 1959?

A: All older E and H Bonds pay more now—an extra 1/4% from now on, when held to maturity. The increase takes effect in the first full interest period after June 1.

Q: Will the Bonds I own automatically earn their new rate?

A: Yes. You don't need to do a thing—just hold on to your Bonds.

Q: When my E Bonds mature, will they keep on earning interest?

A: Yes. An automatic 10-year extension privilege went into effect along with the new interest rate. This means your E Bonds will automatically keep earning interest after maturity.

Q: With the new interest rate, should I cash in my old Bonds and buy new ones?

A: No. The automatic 3 3/4% increase makes it unnecessary—and in almost every case it is—to your advantage to retain your present Bonds.

Q: How are series H Bonds different from series E Bonds?

A: The chief difference is this: You buy H Bonds at full face value and the interest is paid by Treasury

check every six months for the life of the Bond. You buy E Bonds at 75% of face value and the interest accumulated to maturity. H Bonds provide income for living expenses, while E Bonds build a nest egg for the future. That's why many retired people hold H Bonds and families saving for, say, a child's education, buy E Bonds.

Q: In what denominations can I buy series E and series H Bonds?

A: E Bonds: \$25 (cost \$18.75), \$50 (cost \$37.50), \$100 (cost \$75.00), \$200 (cost \$150.00), \$500 (cost \$375.00), \$1,000 (cost \$750.00), \$10,000 (cost \$7,500.00).

H Bonds: \$500, \$1,000, \$5,000 and \$10,000. They are priced at face value.

Q: How safe are U.S. Savings Bonds?

A: Savings Bonds are an absolutely riskless way to save. The United States Government guarantees the cash value of your Bonds will not drop, that it can only grow.

Q: What if my Bonds should be lost, stolen or destroyed?

A: You can't lose. Every Bond purchased is recorded by the Treasury. If anything happens to your Bonds they are replaced—free.

Q: Where can I buy Bonds?

A: Buy E Bonds at any bank—it takes only a few minutes. Buy them automatically through the Payroll Savings Plan where you work. This Plan means you can have any amount you name automatically deducted every payday. The Bonds you buy by installments are delivered to you automatically, too. Your bank will take your order for H Bonds.

Q: How do I help strengthen America's peace power when I buy U.S. Savings Bonds?

A: Peace costs money—money for military strength and for science. And money saved by individuals helps keep our economy sound.

Christian Science Group Of Canal Point

The practical value of striving for perfection will be stressed at Christian Science church services Sunday.

"Spirit" is the subject of the Lesson-Sermon to be read. It will include this admonition of Christ Jesus (Matthew 5): "Be ye therefore perfect, even as your Father which is in heaven is perfect."

Among the correlative citations to be read from "Science and Health with Key to the Scriptures" by Mary Baker Eddy is the following:

"The divine demand, 'Be ye therefore perfect,' scientific, and the human footsteps leading to perfection are indispensable. Individuals are consistent who, watching and praying, can 'run, and not be weary; . . . walk, and not faint,' who gain good rapidly and hold their position, or attain slowly and yield not to discouragement. God requires perfection, but not until the battle between Spirit and flesh is fought and the victory won" (p. 253).

Public Relations Men Are Rewarded

JACKSONVILLE — Pictures of three persons selected to the Florida Public Relations Association Hall of Fame were unveiled in the Florida State Chamber of Commerce Building in Jacksonville recently.

Selected for the honor were Harold Cole, executive vice president of the Florida State Chamber of Commerce; former Jacksonville mayor John T. Alsop; and Carl Graham Fisher, former prominent developer of Miami and Miami Beach. Alsop and Fisher are deceased.

Royce R. Powell, FPRRA Hall of Fame Commission member and past president of the public relations association, conducted the ceremonies which marked the permanent installation of the pictures in the Hall of Fame.

The Hall of Fame Commission periodically selects those Floridians who have contributed the most to the development and progress of Florida through their own efforts.

Other Floridians selected for the Hall of Fame in the past include former Governor LeRoy Collins; Cypress Gardens owner Dick Pope; Ray and Davidson, owners of Silver Springs; circus impresario John Ringling North; former Commissioner of Agriculture Nathan Mayo and railroad magnate Henry Flagler.

Allen Skaggs, Jr., director of public relations and advertising at Silver Springs, is chairman of the Hall of Fame Commission.

Natural Resources Is Meeting Subject

LEHIGH ACRES—Development of natural resources and waterways in the Sunshine State was the theme of a meeting of the Florida Council of 100's natural resources and waterways committee at Lehigh acres recently.

James M. Wellman, president of Wellman-Lord Engineering, Inc., of Lakeland, the committee chairman, introduced Robert Thomas of Tampa as the featured speaker. Thomas, vice president of the National Rivers and Waterways Congress, discussed the "Role of Waterways and Barge Lines in the Development of Florida's Economy."

Gerald H. Gould, president of Lee County Land & Title Co. and vice chairman of the natural resources and waterways committee, was in charge of a panel discussion.

Panel participants included Tom Adams, Secretary of State; William McCree, chairman of the Canal Authority; and John Wakefield, director of the Department of Water Resources.

Cross State Canal Would Give Boost To Mineral Production

TALLAHASSEE — State Geologist Robert Vernon says construction of the cross-state canal would give Florida a big boost in mineral production.

Congress has been asked to appropriate funds to start construction of the barge canal which would cut across the state from the St. Johns River at Welaka to the Gulf of Mexico at Yankeetown.

Vernon said the canal would greatly expand the market for limestone as well as dolomite. Limestone is now used in highway construction while dolomite is used extensively in fertilizer. Vernon explained the canal would place barge transportation at the doorsteps of limestone and dolomite mines making low cost transportation available.

Vernon also predicted the canal would restore the mining of hard rock phosphate which once was a thriving Florida industry.

SALES and SERVICE

Heating — Air Conditioning — Appliances

wash your dishes
the "light" way
... electrically!

electric dishwasher does it cleaner, faster...dries, too!

Just another wonderful way that cheap electricity can save you **EXTRA HOURS**.

A modern, electric dishwasher does the never-ending daily chore in minutes. You just pop everything in . . . dishes, glasses, silver, even pots and pans . . . and set it; then forget it. Your electric dishwasher automatically washes and rinses in water hotter than your hands can stand . . . and dries, too! Dishes come out sparkling, glasses gleam. Everything's "sanitized."

There's no Match for flameless Electric Living

...IT'S CHEAPER, TOO!

FLORIDA POWER & LIGHT COMPANY
HELPING BUILD FLORIDA

An Electric Dishwasher will help you qualify for the MEDALLION award

ready for use. You have more free time to enjoy your family...to relax...to live better electrically. (And, remember, a Flameless Electric Water Heater always provides the extra convenience of a dependable supply of hot water, with safety and precious peace of mind.)

For featured values and easy terms, see the built-in and portable Dishwashers at your electric appliance dealer or plumbing contractor.

Recent reports and comments in the news make this point: Troubles are piling up in the Communist world. They're the result of Failure. On the other hand troubles in the U. S. are the result of Success. The picture is one of widespread failures in the economies of the totalitarian countries. They contrast with successful economies of those countries enjoying a free capitalistic society.

Communism has failed to make Marxism work. Every Communist country is in trouble. The crisis in Soviet Russia, Red China and Cuba are familiar. The failures are all of a pattern. They have suddenly become so obvious that you wonder how much longer Moscow and Peking can bluff the rest of the world. * * *

U. S. News & World Report summarizes the situation beautifully: "Don't underestimate this food crisis facing Khrushchev and Communism. It's the worst setback Khrushchev has faced since he became No. 1 Red."

Time magazine makes this pungent comment: "The revolution of rising expectations has not been satisfied by Communism, even in its own countries. The big meaning of Russia's food troubles is that the Communists are in an iron fix: they are materialists who are bungling materialism."

While Russia has had to boost food prices sharply, we in America are trying to solve the problem of what to do with too much food. A shortage of Russian dairy products brought a price boost in butter to nearly \$2 a pound. At the same time, current report estimates the U. S. Department of Agriculture holdings of Surplus butter may reach 600 million pounds by the end of the 1962-63 season. That compares with 460 million pounds in July, 1964. * * *

European Economics Community (Common Market)—totally unexpected by Moscow and now posing a huge economic and political threat to Russia—also is posing problems for the U. S. But they are problems we could expect to develop within a free capitalistic society—the problems of competition that result from progress in economic development.

As you look at the world today, you can see how economics influence political and social trends. It has been true for a long time. It seems, however, we're just getting around to realizing it and to appreciate how important is an understanding of economics if we are to understand what we want to do at home and why things are what they are in other parts of the world. * * *

I've stressed here recently the vital importance of educating our young people in the fundamentals of economics. According to the U. S. Chamber of Commerce, now is the time to make plans to increase economic understanding in your community during the 1962-63 school year. Chamber executives and Education Committee chairmen have been urged to take advantage of five unique opportunities:

1. "The American Economy," a television course on basic economics and how to teach it, to be broadcast in 160 half-hour sessions starting September 24 over the CBS-TV network and its affiliated stations. Nearly 400 colleges and universities will grant college credit for successful completion of the course.

2. "Economic Education in the Schools," an 88 page report on "minimum understanding of economics essential for good citizenship and attainable by high school students." This report was prepared by a National Task Force on Economics Education, composed of five noted economists and two well-known educators by the American Economic Association.

3. "Study Materials for Economic Education in the Schools," a 48 page list of 97 items (selected from over 7000 reviewed) compiled by a Materials Evaluation Committee.

4. "Freedom vs. Communism—the Economics of Survival," a set of eight pamphlets prepared by the National Chamber for group discussions on this topic. Hundreds of schools and colleges already are using this material.

5. "American Capitalism—an Introduction for Young Citizens and Capitalism and Other Economic Systems," or other texts which contrast the economy of a free capitalistic society with that of a totalitarian state-planned society.

For more information about these materials, you may write to the Chamber's Education Department, 1615 H Street NW, Washington 6, D. C.

Miss Cheryl Pierce Honored At Party

Mrs. Olla Vene Weeks entertained at the Pahokee Woman's Club Building with a "sweet sixteen" dance-party honoring her daughter, Miss Cheryl Pierce who was celebrating the sixteenth anniversary of her birthday.

A motif of pink and blue was used in the decorations. The large cake represented a doll and was iced so that each serving was topped with a "16". Dancing was enjoyed from eight until twelve midnight, and the honoree received many lovely gifts.

Refreshments of chicken salad sandwiches, mints, nuts, cokes and cake were served to approximately 80 guests.

Those assisting Mrs. Weeks were Mrs. Cleve Cruthird, Mrs. R. B. Gray, Mr. and Mrs. Alton Mills, Mrs. Ray Angel, Mrs. D. Hines and Mrs. Allie Mae Watson.

Mr. and Mrs. T. E. Pennington and family have returned from a vacation trip to Salem, Ala. They have also been recent guests of her mother, Mrs. J. A. Feltz, at Bradenton.

Needs For A—

(Continued From Page 1)
minimum of 3' 8" to allow rapid evacuation.

"Wall construction consists of 2" x 6" wood studs and plaster, not meeting the required fire rating.

As to the function of the Belle Glade facility, the report said that the shape of the building would lend itself well to redesign and could possibly be fitted into the scheme of a new hospital on the same site with extensive removal and replacement of walls, adding new plumbing and electrical systems, and could be made into a workable nursing unit of approximately 35 to 40 beds.

On several occasions, recommendations have been made for either modernization or abandonment of the Belle Glade Hospital.

In a letter to the Southwestern Board in 1961, James R. Shelton of the Florida Development Commission stated: "I discussed this (the Belle Glade Hospital) with Mr. Forehand and he advises that, under the circumstances, he does not see where we could participate in anything other than new construction. I am sure this is the same impression I left with you. As a matter of fact, the Federal Government still has not entirely released the present structure to your ownership."

Autha W. Forehand, manager of the Florida Development Commission's Hospital Construction Department, said in a letter to the board shortly after Shelton's letter was received, "I can only recommend that you give consideration to building a completely new hospital, since it is definitely possible that you would not save much money by building a new hospital core, and then renovating the old facility to bring it up to standards."

The Joint Commission on Hospital Accreditation mentioned four improvements needed on the Belle Glade facility.

"1. More adequate auxiliary facilities, on all nursing units.
2. Elimination of fire hazards.
3. More adequate operating facilities.

"4. Modern kitchen facilities."

The need, according to the report is for a general hospital of sufficient quality and quantity to serve the needs of the area. It has been demonstrated that 90 percent of illnesses can be cared for in a general hospital of 100 to 200 beds. Those modern conditions which are obscure require the refined diagnostic procedures found only in large hospitals, specifically the university hospital. This percentage is low, roughly 5 to 7 percent. The remainder have hospital ties in other areas.

"It is apparent," the report concludes, "that the need is for a mod-

ern hospital of approximately 100 normal beds with an immediate complement of 120-135 beds in bedrooms designed for patient occupancy. The care of auxiliary services should be complete and should be expandable to serve at least 175 to 200 with a minimum of disturbance to the continued operation of the hospital. The hospital should be so designed that minor alterations are made within the core and all additions to be made on the outside of the walls of the basic building."

NEW ENGLAND VISITORS

Mr. and Mrs. Ted Beach of West Hartford, Conn. were the guests, last week, of her brother-in-law and sister, Mr. and Mrs. G. B. Ramey; and her brother and sister-in-law, Mr. and Mrs. Philo Williamson and Mrs. Lizzie Kirkey at Canal Point.

City Of Venice May Wreck Waterway

ENGLEWOOD — Secretary of State Tom Adams says opposition by the City of Venice may wreck the development of the 150-mile intracoastal waterway down Florida's West Coast.

In a speech prepared for delivery at a banquet by Englewood civic clubs at which he and Conservation Director Randolph Hodges were honored guests, Adams said that interests in Venice were opposing the only authorized route for the canal. He stated a seven mile stretch of the canal had been delayed for two years by opponents of the waterway.

Mrs. Leila Parks of Reynolds, Ga., is spending several weeks here with her sister, Mrs. Lucile Renouf
